Floor Track Compact System

By squeezing out excess aisles, **Compacting Systems** offer maximum space utilization, storage density and space savings

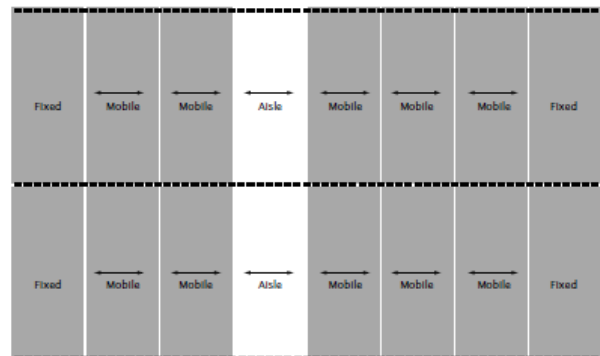

Floor Track High Density Mobile Storage System

- Like the Space-Tite Overhead Track System and components, the Compact System is built to your unique and custom specifications and can accommodate either new or existing shelving
- The Compacting System is the most cost-effective of all the Tarrison High Density Storage Systems
- Low-profile tracks help maintain easy foot and cart accessibility and require no decking or false floor
- Retrieval times increased by placing more material along main aisles
- System access through just one moveable aisle
- Simple installation makes this system easy to relocate or expand to accommodate system growth
- Contact your Tarrison Representative for a detailed quotation

2 Track Compact Installation

- 2 Track for use with Single "S" and Back to Back "BB"
- 3 Track for use with Double Deep "DD" and Quad "Q"
- Reference page 57 for detailed size listing

3 Track Compact Installation
